Comments: Dispersed Camping Rehabilitation and Improvements #59452

#### Commenting on This Project

Yesterday I did a day ride visit up Green Peter Dam location and the fire ring dispersed camping locations.

The garbage and lack of respect in the area came as no surprise as I have been enjoying dispersed camping in our National Forests for decades. My husband spent twenty-five years working for USFS and retired with the BLM. That allowed me to enjoy and appreciate our National forests.

Over the years the disrespect of dispersed campers has gotten beyond anything I could have imagined. Locally in my area it seems a lot of abandoned RV's. Chatting with the local staff here in Springfield the cost has been out of control.

I did not see the sign posted near the road soliciting input or comments with the June 4th deadline until yesterday. Decided to write anyway.

My suggestion is to require dispersed camping permits. I wish I had the answers to how this would be enforced with your limited budget. The fee's from those of us that are honest would assist in clean up of those that are not.

Thank you for all your efforts to address such a challenging project dispersed camping brings to your work load.
