Comments: After reviewing both summer alternatives and winter alternatives. My management view most closely aligns with alternative C for both summer and winter plans.

I have traveled many of the forest roads and hiking trails since 1968. I've had the opportunity to explore on foot as well as by ATV, motorcycle, high-clearance 4 x 4 and snowmobile. I would support a limited expansion of motorized routes, especially when the expansion eliminates a dead-end. I would also support maintenance of the motorized system to repair natural wear and tear on motorized routes that are currently closed or partially closed. Examples are: Tomichi Pass, Westside of the Alpine Tunnel, Williams pass and a number of others.
