Title:

Comments: Water preservation is crucial to the future of our communities. As a fisherwoman, hiker and human being, water is an essential part of my life. I have been fishing several times in the Kannah Creek Watershed area and have reviewed the plans of the Forest Service when it comes to this area. I believe it is of importance to designate this location as an area to be managed for Wilderness Qualities and Watershed Protection. The wildlife there deserves our protection. Humans deserve the scenic beauty of this area and the solitude it can provide. Thank you for your time and concern.
