Title:

Comments: My family and I enjoy skiing at Lutsen as well as hiking, camping and bicycling in the area. I support the granting the special use of forest land for this purpose.

I have two concerns related to parking infrastructure. First, it makes no sense to start with a know parking shortage and no plan to address it. Second, please consider surfaces that are not impervious to water in order to reduce runoff issues.

Finally, I hear many people who do not seem to have had time to respond, so I support a 30 day extension for public comment.

Thank you.
