Title:

Comments: This expansion project request is NOT acceptable. This area needs to be maintained as natural habitat for the environment, wildlife, forest and humans to visit and enjoy. We all suffer from the continuing change of the climate. And destroying this area with more commercial development does not help at all. We need to maintain our GREENSPACE in this state and country. Look at Brazil destroying the rainforest, more climate change, CO2 and different forms of life found and release creating more disease. This only ONE EXAMPLE. We need to preserve what we can, it will never be returned. My vote is NO for this expansion!
