Title:

Comments: "Spring Mtn WHB Complex EA" ... please give our wild horses and burros a break from roundups.

This entire 2021 year has been one horrific roundup after another and every one of them with avoidable deaths plus so many animals (mostly foals) injured. The Forest Service and the BLM needs to take a BREAK from any more roundups, no more darting, until advocates and government agencies can actually COLLABORATE on how to move forward.
