Title:

Comments: The area you are planning for your next project is home to many wildlife creatures. Your project will put them out of homes and make them leave the places that they have grown in. There are two eagles that call that area home. Please leave the area alone. Don't mess with the wildlife out there. Jackie and Shadow (the eagles) have many fans that watch their eagle cam everyday to see how they behave in their natural habitat. The place they have called their home. The place they are trying to raise their own family at. (If you want, you can go to the Big Bear Valley Eagle Cam and watch for yourself.)

Also, stop cutting down our source of oxygen. Maybe y'all need to sit down and watch The Lorax again.
