Comments: I would prefer to see a scaled back project, where not so much of each mountain side is clear cut for ski runs. This large of a project will also require more water to be pumped for snow making, which was a hot button issue a few years back when Lutsen increased their water pumping. Another concern is the location of the Superior Hiking Trail, and any reroutes necessary. I am a hiker, and would hate to loose the backwoods experience I enjoy, just so a down hill skier can have a new ski run.
