Title:

Comments: Please reconsider the plans which would be harmful and impact the wildlife of Big Bear Valley, especially that of the American Bald Eagle couple which are thriving and have had their home for years in the vicinity of your project which would bring more human traffic and noise and more than likely trash to not only the eagles but all other wildlife in the immediate area. Humans have shown that they would rather take over more of nature than to protect nature. The Big Bear Valley eagles have become known world wide and it would be a shame to lose them not only for the thousands of viewers of the BBV Eagle Cam but also for the school classes who view them as aids in educating the children. Please reconsider other options for the funds.
