Comments: I object to ATV use in the forest at any time but that is not the issue. I strongly object to amending the 2006 plan to change the closure dates for trail use to an optional use date at the discretion of officials in the WNF. When the planning process begins again, to allow decision making be completely transparent to the public, there should not be planning by amendments. This amendment provides a piecemeal approach to management, which rarely proves to be in the best interest of the forest. I know the FS is attempting to increase recreational use of the Wayne. ATV's are not for recreation. They are an abomination on nature, with the increase of pollution and obnoxious destruction of trails. That is a no win for people like myself who want them banned from public lands. The FS will never ban them so at least minimize the time they can use the forest. It is preposterous to think users do not have enough months to ride with the current dates.
