Title:

Comments: As a frequent and passionate user of the Pisgah Ranger District of Pisgah National Forest, and someone who frequently rides and runs from The Hub into the Forest, I fully support this project.

It will likely alleviate traffic and access issues posed by traveling by bicycle into the Forest along US Highway 276, or by crossing the Highway 64/276 bridge just downstream of the proposed bridge project site. Both of these currently-existing options are commonly-used, but very unsafe, and a pedestrian bridge from Highway 276 at the Forest entrance to the Estatoe Trail would greatly improve safety, along with connectivity for hike, bike and other human-powered users.

Thanks!
