Title:

Comments: I was disappointed to read this proposal. First, outdated studies are not acceptable justification for the proposal. Second, Big Bear Valley is the 7th most biologically diverse place in the country. Third, this proposal will negatively impact irreplaceable and unique habitats, rare and unique plants, and the wide variety of wildlife, including rare and endangered species. As the wants and desires of humans continually increase, the less open and wild space is left in our fragile world. I respectfully and strongly oppose the proposal.
