Comments: I strongly oppose any aspect of the presented plan that further limit motorized over the snow vehicle opportunities. Of particular concern is language which over emphasizes impacts to wildlife which are show in other studies to be very marginal (see NPS commissioned studies on wildlife impacts from snowmobiles in Yellowstone National Park). I'm concerned the current language will be used to close additional areas to snowmobiling without adequate and specific environment impact studies supporting such closes. I request references to seasonal closures be amended to reflect closures only after specific environmental impacts studies require closures.
