Title:

Comments: Please include the CONSERVATION ALTERNATIVE in the Manti La Sal Forest Management Plan. There is tremendous damage and over grazing in most areas and especially riparian areas of the La Sal Mountains from cows. Please significantly reduce cattle crazing on public land in the Manti La Sal National Forest. Please capture and remove non native mountain goats from the La Sal Mountains, they are quickly destroying critical alpine ecosystems above treeline! Please significantly reduce grazing, timber, and extractive industries and focus on expanding non-motorized and educational opportunities in the Manti La Sal National Forest.
