Comments: I have long experienced the Manti La-Sal Forest and all it offers. The recreational opportunities are immense and offer opportunities for all recreational enthusiast's, both motorized and non-motorized. The Manti La-Sal Forest has existing trails for motorized trail opportunities, but even these trails need new links for consistent loops that can handle future increased visitation. This can assist in organized travel that is predictable for non-motorized and wildlife uses alike. In stating this information, the Land Management Plan (LMP) or forest plan adopted in 1986, should keep the same Recreation Opportunity Spectrum (ROS) zones while disregarding the current 'draft' LMP.
