Title:

Comments: 1) I support the wilderness designations of Alternative D for myself and future generations.

2) Please do not keep existing Winter Management Travel decisions as they are. The process should be opened up with suitability determinations made for specific sites with input from all stakeholders.

3) Please regulate drone use near trails and summits, and prohibit drones in Wilderness, Special Management Areas, and critical wildlife areas. Thankfully, I haven't encountered drones yet in Colorado, but I did have one summit experience in Norway marred by a drone's long and noisy flight. It spoiled my attempt at solitude.
