Comments: People that use motorized vehicles actually contribute financially to the Forest Service and BLM. Hikers, bikers and horse back riders don't. Don't even try to act like you're concerned for the wildlife! Wildlife are "managed" toward survival of the fittest and can do that without some "authority" out there handing out tickets but certainly not handing out feed when the animals are starving. The forestry management has been a disaster. High paid employees who do nothing except hand out tickets. Think about where your income comes from....people using motorized vehicles! Wildfires aren't caused from climate change. Wildfires are caused from letting environmental groups dictate to the forest service how the forest should be managed and the pine beetles have devastated the forest. Log it, graze it or watch it go up in flames!
