Comments: I'm here in Australia and totally agree these animals horses and donkeys and derivativez should remain in their natural environment. No photos have shown any in poor body condition meaning that theres plenty of food to keep them healthy and alive. Grazing cattle and sheeo should not be on reserved protected natural areas designed and designated for wildlife. What these government authorities are doing is just appalling and being seen around the world. Breaking up family units and cauaing ijury and death while this is going on. These so called pens have no cover or shade and ground is not cleaned up of manure and inadequate food supplied as a cost to your taxpayers. Wild animals eat all sorts of plants in their diets which wouldn't be supplied in these pens. Let them teturn to their homes.
