Comments: I am writing to oppose the upcoming prescribed burns as well as the use after of herbicide to control the weeds that might grow because of the burn. I have read the draft of the environmental assessment and it is not enough to justify the proposed burns. I want to see a full environmental impact statement.

As a health professional, I am aware of the deleterious effects of smoke on people's health. As a citizen who supports nature, I am concerned that there is not enough that the practice of prescribed burns prevents wildfires. In addition, I am concerned that the chemicals used ruin the soil, destroy wildlife and interfere with the health of the forest community.

Thank you.
