Title:

Comments: Me and my family recreate at least once a year for at least 1 week and enjoy Grand Mesa, Uncompahgre and Gunnison Forest so much we wish we could stay there the whole year.

Is the time of the year that the whole family recreate motorcycle riding on single loops. The loops are the best in the world, nowhere else you can find them.

We support Alternative C with the following modifications:

- \*The addition of verbiage from Alternative B that protects motorized access to the Continental Divide Trail and areas around the trail.

- \*The addition of specific protection to any route that has already been approved as a motorized route in site-specific Travel Management by the FS. In particular any of these routes that have been proposed to be encompassed by a Primitive or Semi Primitive Non-Motorized ROS category.

- \*Consistency between Wildlife Management Area trail densities and best available science that are based on wildlife population counts published by CPW.
