Comments: Sirs, I am writing in regards to the up coming revised forest plan for the GMUG area. As an out of state visitor who has traveled to and enjoyed Colorado many times to ride off road in the wilderness. I am hoping the new plan allows continued use of our public lands by all including motorized use. Specifically I would like to see incorporation of more single track motorized trail of all skill levels. My concern is that a more restrictive plan not allowing continued and expanded use by motorized users will reduce access by a majority of citizens.

thank you for your consideration William H Wells
