First name: Felice

Last name: Pace

Organization: Grazing Reform Project

Title: Coordinator

Comments: In the past, similar FS hazard tree projects have felled and logged trees that are not a hazard because they were leaning away from the road. Please develop, display and implement tree selection criteria that instruct those implementing the project to not fell or log trees that are not a hazard because they are leaning away from the road or trail.

Also, any and all trees that are located within riparian reserves but are true hazards should be felled but left in place. We need that wood in our riparian areas.

Don't use "hazards" as an excuse for unneeded and damaging tree removal.
