Comments: Hello,

I deeply support fire safety, conservation ecology, and know well the need for a fire sustainability & resiliency strategy that takes climate change and the increased frequency of fires seriously.

I have concerns about the proposed strategy simply because a full Environmental Impact Statement, alongside additional research around the most current fire resiliency & conservation strategies, have not been completed.

I want to support the Forest Service, and applaud that they are taking this issue seriously. However, as a resident of this beautiful (and ecologically fragile) neighborhood, I cannot support the proposed project as it is worded now.

Please take a step back, slow down, and do the research needed to be of the greatest service possible to the forest and its neighboring people, plants, and animals.
