Comments: We as taxpayers DO NOT want anymore money spent on rounding up our wild horses. This is not a viable solution but a brutal temporary myth. There are alternatives like having the 2 % of livestock that uses public land to be removed. This will NOT affect the usa or global 380 billion meat market won't even make a dent but it WILL save our horses. They are suppose to be protected but are scapegoats for ranchers . Time to end the bad policy we ALL know this is not working except for a few with a personal agenda. NO MORE ROUNDING UP NO MORE HORSES GOING TO SLAUGHTER. AMERICANS DO NOT SUPPORT THIS do the right thing
