Comments: Thank you very much, so next month of New Mexico state forestry capital district forester just wanted to comment say thank you all for putting together this opportunity for folks to have opportunity to comment and forgetting the draft down for review and I wanted to mention also that I placed a comment, a while back regarding the proposal for wilderness areas I know it's several the cooperator Community meetings, there was a discussion by both Lincoln and Otero counties about limiting concern about expanding wilderness areas my comment had more to do with if it's possible if there is areas wilderness going to be added, that, if we can move those towards their desire condition, while we still have opportunity for mechanical treatment and prescribed fire prior to their listing so that leaves those options available, and in that way when there is fire natural fire in those new wilderness designations, the likelihood for positive outcomes will be greater and I'll just leave it at that.
