Title:
Comments: Please consider the Conservation Alternative for the Manti-La Sal's revised forest plan

Oct 16, 2021

Forest Supervisor, Manti-La Sal National Forest

Dear Manti-La Sal National Forest,

Thank you for the opportunity to comment on the revised forest plan for

the Manti-La Sal National Forest.

The revision of the forest plan for the Manti-La Sal National Forest

comes at a critical time: the impacts of climate change are already

becoming apparent as the Colorado Plateau gets hotter and drier. It is

imperative that the revised forest plan squarely addresses future

conditions by considering the impacts of climate change.

The Forest Service should use the revision process to implement

additional measures to conserve resources within the Manti-La Sal

National Forest such as water, native plants, old trees, wildlife, and

their eco-systems.

The Conservation Alternative prepared by conservation organizations and

concerned citizens addresses the importance of Tribal consultation and

adapting to the impacts of climate change.

I ask that you fully analyze and consider the Conservation Alternative

as one of the formal alternatives developed in the upcoming draft

environmental impact statement.

Sincerely,

Katherine Delanoy
