Comments: Dear President Trudeau

I am asking that a plan for the Boreal Forests of Canada be implement Alternate D, There is a huge need for the forest to remain intact due to the oxygen it releases. This will help cool down the earth's surface. More forest land is needed to off balance the threat of the earth continuing to heat up.

The forests are needed for millions of wildlife that depend on the forest for their lives needing the protection and bountiful food sources are within the boundaries. There are 5 rivers, creeks running through that need attending to as well to provide clean water for every thing that has a need.

PLEASE DO NO HARM by not allowing the forest be cut down.
