Comments: My family has spent their summers in the Gunnison national forest for over 40 years. My father started taking us there in the 1980's and now my children enjoy fishing, hunting and the scenery. We use our side x side to access several remote areas. I am definitely hopeful that motorized travel is not further restricted because we have several older family members and some disabled that cannot otherwise access the back country areas. Not everyone can hike 10 miles and that doesn't mean that they should be denied access to our public lands. I also have friends with remote properties that are concerned about road closures affecting access to private property. Please take this into consideration when revising the plan.
