Comments: I am writing regarding the Forest Plan Revision for GMUG. As a multi-use trail user and Colorado resident, I wanted to write a letter in support of Alternative C since it seems to best align with my values of hiking, motorized use, hunting, and fishing. I love all of the recreation opportunities that the GMUG provides for individuals, families, and elderly/disabled users.

I would ask that Alternative C be the chosen path forward with a few changes:

- Protect motorized access to the Continental Divide Trail.
- Protect all existing routes that have already been approved as a motorized route by the Forest Service.
- Provide consistency between Wildlife Management Area trail densities and best available science that are based on wildlife population counts.
