Comments: Thank you for the opportunity to comment on the Manti-La Sal Draft Revised Forest Plan.

As a frequent visitor, the Manti-La Sal is very important to me, so I'd like the Forest Service to analyze the Conservation Alternative, in full, in the upcoming Draft Environmental Impact Statement.

In addition, I'd also like the agency to:

1. Adopt the conservation alternative's wilderness proposal.
2. Emphasize protection of native forest and vegetation including old-growth forests pi[n]tildon pine and juniper woodlands, and sensitive high-alpine plant life
3. Adopt the proposed recreation opportunity spectrum (ROS) classes in the Forest Service's current draft. The Forest Service should not keep the door open to future motorized use by designating a "motorized" ROS class in areas where this kind of recreation is not currently occurring and is counter to protecting other recreational uses and resources.
4. Place a high priority on protecting and preserving cultural sites.

Thanks!
