Title:

Comments: I have been a resident of the western slope of Colorado since 1967. During these years, I have seen many changes come to this area. Some are good, but many are a detriment to our ecosystem, wildlife and public lands.

I am advocating for Baldy and Bear Creek Wilderness; special management designation for Mount Hayden and Mount Abram; Bear Creek and Cow Creek as wild and scenic eligible rivers; robust tidal consultation; Analysis of Climate Change impacts; Stronger protections for wildlife; Reduction of logging and associated road building in backcountry; and the Community Conservation Proposal. Respectfully submitted
