First name: Roger

Last name: Cesario

Organization: Dragonfly Anglers

Title:

Comments: Wildlife needs more consideration than your preferred alternative, nearly every use on the forest is detrimental to wildlife. Recreation, motorized and non-motorized trail are especially hard on wildlife. Numerous studies have shown the effects of elk abandoning calves and vacating heavily used areas. Alternative D is better than any of the other three alternatives. I feel that Alternative D needs some adjustments and that there should be net zero new motorized trails added to the forest. Any new trail should be met with equal amounts of closed trails. Ebikes also should not be allowed on non motorized trails or to open up access to hunting areas that are non motorized. Possibly look at more seasonal wildlife closures. More security habitat for wildlife and wildlife areas.

Thank you for your time and consideration
