Title:

Comments: I am an avid dirt bike rider living in Colorado who enjoys single track trail riding the most. I also enjoy the many areas available for me to dual sport motorcycle ride.

I've enjoyed my experiences riding within GMUG especially Uncompahgre where I have been able to both ride single track trails and camp, a favorite recreation of mine in other areas across the state as well.

I'd like to see more opportunities for myself and all other riders who love single track loop trails. I've reviewed the GMUG Forest Plan and Alternative "C" to me offers the best opportunity for motorized recreation across the forest. I understand others would like to see more wilderness land added and although Alternative "C" does not add any new land it does not reduce current wilderness lands. I believe adding more wilderness areas could result in more multiple-use conflicts on non-wilderness land an experience I've been fortunate not to encounter but several folks I ride with have.

Alternative "C" is not only the best for motorized recreation across the forest but for all others who enjoy the various activities within the forest such as camping, hiking, and just enjoying the outdoors experience.

My hope is to have my comments taken into consideration when making the final GMUG Forest Plan determination.
