Title:

Comments: My family and I have been recreating in the Grand Mesa Uncompahgre Gunnison (GMUG) National Forest for almost 20 years. We explore on foot, on mountain bikes as well as on dirt bikes. We've always been respectful of this opportunity and left the trail cleaner than when we arrived. We'd appreciate the opportunity to be able to ride single track here for many generations to come. We feel alternative C is the most responsible option with a few modifications:

- \* The addition of verbiage from Alternative B that protects motorized access to the Continental Divide Trail and areas around the trail.

- \* The addition of specific protection to any route that has already been approved as motorized route in site-specific Travel Management by the FS. In particular any of these routes that have been proposed to be encompassed by a Primitive or Semi Primitive Non-Motorized ROS category.

- \* Consistency between Wildlife Management Area trail densities and best available science that are based on wildlife population counts published by CPW.

Thank you for the opportunity to comment.

Kind Regards,
