Comments: Hello and good day. The USFS has been a great land manager and I would like to strongly support the Wildlife Management Areas with focused management identified by the USFS in "Alternative B" and the plan components proposed for their management.

Public lands are under pressure from many sides and I believe we need to support areas that are focused on wildlife protection, less roads, and vehicle traffic, and provide us with the wild experiences you have so long created. Please consider this a vote for wild lands.
