Title:

Comments: I travel to the Silverton Ouray, Telluride area regularly to enjoy the mountains and the sights. I travel over all the trails in Jeep. Always stay on the approved trails. All the trails need to be kept open to legal off road vehicles. If there is any restrictions or changes to access, the trails need to be carved out of any restrictions. I know this has been done in other areas where existing trails in a newly designated wilderness area were carved out with an easement to allow access and back country camping.
