Comments: I am writing to state my opposition to Alternative D for it's massive negative impacts to motorized trail use. I am most in favor of Alternative C because of its similarity to the current management plan which has supported the slow and gradual development of trails and access to a wide range of the public. As more people move to the western part of the state, this are will become more popular and I feel that it is important to leave the option of constructing new trails for both motorized and non-motorized uses on the table to prevent the area from becoming congested and potentially hazardous for all types of forest users. Alternative D does not allow the necessary flexibility for expansion and adaptation to future conditions on the mesa.
