Comments: I recently received information on the grazing allotment I live in, South Lady Allotment.Just starting to read it, I have found that the "spring development" east of mile Ridge Start, that's my spring. I appropriated above ground water for that spring in 1987. It's on my property in LIttle Dry Canyon. I don't want any developing for cows going on there. My well and solar panels are there. There's some water for deer, mountain goats, sheep, but not enough for cows.Thank you for taking this off the table for cows.See attached PDF for Figure of the allotment with spring circled and identified as "off limits to cows"
