Title:

Comments: Please stop closing roads, you are hurting future generations and ruining history. You have no right to close Sugar Creek or the upper road to Cinnabar. You just want to close it so you can burn more cabins and then pretend you don't know why they aren't around anymore. The forest service should be ashamed of themselves. Keep roads and trails open, let us recreate and enjoy the back country. Stop overstepping your boundaries. The government is quickly becoming the enemy in the United States and it's because of corruption such as this.
