Comments: Why are you doing this. I use those roads and trails and enjoy the back country. This would be a big disappointment to me. Please do not shut down these roads and trails. See below.

The Forest Service has decided to decommission many of the remote roads you travel on which enhance your Backcountry experience. Please make comments to them to stop this plan to make your visit less accessible to your Forest. We need to object specifically to the closure of Quartz Creek Road (which is pictured above) Sugar Creek Road, Three Mike Road, the upper road to Cinnabar, the access Road to the Red Metal Mine and any other trails or roads in the area. Also opening a bypass above the slide near the Eugin Ranch would be beneficial.
