Comments: Thank you for extending the comment period. Please consider the following, when finalizing your plan:

- * Keep roadless areas roadless
- * Where beetle-killed stands must be logged, thoroughly decommission temporary roads
- * Reduce the number of A.U.M.s per allotment in alignment with conditions/drought
- * Designate some Wilderness Areas at lower elevations wherever possible
- * Construct new trails only where human "pressure" on wildlife won't be significant
- * Limit drone activity as much as possible

I am a local citizen who utilizes the GMUG for camping, fishing, hiking, hunting and skiing. I ask that you PLEASE don't provide more access, especially by motorized means.
