First name: Angie

Last name: Dixon

Organization:

Title:

Comments: Leave wilderness as wilderness so it can do its job which gives us food, clean air, clean water and healthy ground. It gives us bio-diversity and a whole interconnected chain and we need to learn to live with nature, not impose our will on it. All we have done by imposing what we think we need or is helpful or is just plain greedy is to destroy it and destroy its healthy functioning which we ALL need to live on this planet. USE your COMMOM SENSE. Your ideas are not necessarily helping wilderness and we have to start respecting the way wilderness works. It works better without us frankly, so leave it alone!
