Comments: To whom This May Concern,

As a recreationalist in Colorado and user of the GMUG regularly. Its a special place and I think Alternative B would do an okay job at maintaining those things I hold dear. However, I would like to see more air quality protections in the reduction of the presence of the West Elk Coal Mine and would like to see more responsible fire abatement measures rather than treating the timber as a commodity to be sold for paper products and the like.

Thanks,

Alice Gustafson
