Comments: All you people at the forest service care about is board feet of lumber. We the citizens care about nature and leaving dead trees and burnt trees alone. This just sounds like another forest service scam. Leave the trees alone. Keep your ugly bulldozers out of the forest. Do you really need to ruin every square inch of land? Burnt forests are beautiful. Bulldozed forests are disgusting. Time to remove the forest service From the Ag department. Trees even burnt trees need to be left alone. Stop destroying our land. I am not a robot.
