Comments: Hello. Please make sure that WILDERNESS areas are left alone. Dead trees provide habitats for many animals and are a natural part of our forest ecosystem. Where trails exist already, and trees have fallen across them, it's important to use crosscut saws to clear the way, NOT CHAINSAWS. The easier you make it for people to get in there, the more people will visit, hastening the destruction of the forest. Please allow those people who do go in to experience real nature, not a curated, safety-first version. Thank you.
