Title:

Comments: The government is like a little kid, keeps spewing out wants until something they ask for gets granted. One thing after another with the Forest Service trying to push machines into the wilderness, whether it's to use helicopters for something or other or chainsaws for another. Wilderness is just that and should be left alone. We infringe on habitats enough; let's get some good ol' muscle work into play and break out the crosscut saws. Far too much noise in this world as it is.
