First name: Scott

Last name: Wasson

Organization:

Title:

Comments: Please do not close any of the roads or trails under consideration in your latest management plan. The Yellowpine area has become a vital hub for access to Idaho's Central Mountains, access that is enjoyed by many diverse users. Maintenance must play a major roll in your decision making process, since you seem to prefer to close every road or trail your agencies are not willing to maintain (regardless of your bulging surplus budgets). We users have taken it upon ourselves to perform maintenance on thousands of mile of trails and access roads that were previously under your responsibility. Leave these roads and trail systems open, we will continue to utilize them and maintain them. You will be free to continue cruising around in your \$80,000 pickups or hanging out in your cozy office cubicles. That works for you, right?

Sincerely

Scott Wasson
