Title:

Comments: Any and all Wilderness areas should be excluded from the proposed logging and hazard tree removal, because for one thing, Wilderness areas were never intended to be managed as one would a park.

Further, in non-Wilderness areas, unless a so-called "hazard tree" is hanging over a road or some location which could easily injure visitors, it should also be left alone as well.

There are some in the agency who are always looking for an excuse, any excuse, to "get the cut out", so please try to restrain those who are obsessed with clearing every tree that doesn't look picture perfect. And also try to corral those who cannot stand to see trees "grow old"--trees which will probably be used for toilet paper and junk mail anyway. Well youo get my drift.

So in summary, remember to exclude the Marble Mountains, Trinity Alps, Kaiser, Ansel Adams, John Muir, Golden Trout, Monarch, Jennie Lakes, Domeland, Yolla Bolly Middle Eel, Snow Mountain, Yuki, and Bucks Lake Wildernesses from the proposal.

Thanks for reading this.
