Title:

Comments: Dear Forest Service,

I'm writing in regard to the GMUG Forest Plan revision.

- I believe that e-bikes, since they are motorized, only be allowed on motorized trails.
- I support CBMBA's desire for "Increase Recreation Emphasis Corridors/Areas (MA-4.2) and concentrate on stacked trail systems with progressive, purpose-built trails and features, directional travel, specific identified uses, and decking/boardwalks in identified areas."
- I hope that you incorporate the Special Management Areas identified by the Gunnison Public Lands Initiative into the final plan.
- I support building and charging for infrastructure on our Forest Service, especially parking and camping. I support a parking fee structure similar to what is used in Sedona where parking at any place on public land requires a parking permit, purchasable at unmanned kiosks. Parking Fees are tiered so that the price for a yearly pass (for locals) is not much more than the parking fee for a week.
- I support keeping motorized trail use out of the Gothic and Washington Gulch areas, but I support the creation of more motorized trails, particularly for connections, in Brush Creek, Cement Creek, and the Taylor Reservoir area.

Thank you!
