Comments: We have used these access roads for a lot of years to be able to get into the back country to be able to go camping, hunting, hiking and fishing without having any detrimental effect on the environment. Idaho has more wilderness area than any other state in the Union and closing ease of access to more land wil do more harm than good. If you cannot go out and enjoy the beauty of this Great State without so many restictions on travel, then we might as well become another Calafornia.
